hogarth s epoch defining paintings and engravings such as gin lane and the rake s progress are renowned he was london s painter par excellence and supplies the

most enduring vision of the eighteenth century's ebullience, enjoyments and social iniquities from his lifelong marriage to Jane Thornhill, his inability to have children, his time as one of England's best portrait painters, his old age and unfortunate dip into politics and ultimately his death. Hogarth is the artist's life through his very own eyes, recommended for readers of Peter Ackroyd and Hilary Mantel. This novel charts Hogarth's personal story in four parts, carefully blending the facts of his life with fiction, beginning with a childhood spent in a debtor's prison and ending with his death in the arms of his wife.

This book highlights new developments in the wide and growing field of partial differential equations (PDE) constrained optimization problems where the dynamics evolve according to a system of PDEs. These arise in science, engineering and economic applications and they can take the form of inverse problems, optimal control problems or optimal design problems. This book covers new theoretical, computational as well as implementation aspects for PDE constrained optimization problems under uncertainty in shape optimization and in feedback control and it illustrates the new developments on representative problems from a variety of applications.
