Gurtler Åsa Gerger Swartling*

author pat mccarthy explores the fascinating life of the man who blazed trails built towns and learned the ways of the american indians well enough to be adopted as one of them showing the many myths and legends that have developed about daniel boone throughout history mccarthy helps separate fact from fiction in the life of the great early american pioneer who is best known for having opened the wilderness road to the west

nature interpretation in the nordic countries is a book about communication between nature interpreters and their participants in our landscapes it's about first hand experiences of nature and the importance of paying attention to what is inspiring and fascinating especially valuable or threatened and about possibilities to reflect over the relation between human and nature educators researchers and interpreters contribute with articles about nature interpretation it theory and practice the book is written for everyone who is interested in how interpretation can contribute to a sustainable future nature conservation and areas in society like public health democracy and the right for all citizens to visit and experience nature the purpose is to inspire nature interpreters to offer more and even better experiences and learning in the nordic nature and cultural landscapes

this volume is devoted to aspects of space that have thus far been largely unexplored how space is perceived and cognised has been discussed from different stances but there are few analyses of nomadic approaches to spatiality nor is there a sufficient number of studies on indigenous interpretations of space despite the importance of territory and place in definitions of indigeneity at the intersection of geography and anthropology the authors of this volume combine general reflections on spatiality with case studies from the circumpolar north and other nomadic settings spatial perceptions and practices have been profoundly transformed by new technologies as well as by new modes of social and political interaction how do these changes play out in the everyday lives identifications and political projects of nomadic and indigenous people this question has been broached from two seemingly divergent stances spatial cognition on the one hand and production of space on the other bringing these two approaches together this volume re aligns the different strings of scholarship on spatiality making them applicable and relevant for indigenous and nomadic conceptualizations of space place and territory

since the refugee crisis in 2015 eu member states have claimed to represent or act on behalf of the union when regulating migration some measures were outside or at the margins of the eu legal order how can member states reconcile their double bind as members of the union and as sovereign nation states enriching legal doctrine with constitutional theories this book argues that eu law is still able to uphold the rule of law in line with its foundational promise while also empowering the member states to govern migration in the common european interest

southeast europe s history of the last two centuries is marked by deep transformations and upheavals the emergence and disappearance of states ethnic conflicts and wars changes of political systems economic crises migration movements and natural disasters most of these upheavals have been experienced as deep crises forcing people to adapt to often radically new situations this can cause crisis management to become a permanent way of life the book focuses on the cultures of crisis it analyzes the reactions of societies or individuals to them their impact on everyday life on peoples strategies of coping on the processes of adaptation and on peoples attitudes focus is placed on crises relating to migration and post socialist transformation to politics and religion and to labour relations series ethnologia balkanica vol 18 subject sociology southeast european studies politics

foodborne illnesses continue to be a major public health concern all members of a particular bacterial genera e g salmonella campylobacter or species e g listeria monocytogenes cronobacter sakazakii are often treated by public health and regulatory

agencies as being equally pathogenic however this is not necessarily true and is an overly conservative approach to ensuring the safety of foods even within species virulence factors vary to the point that some isolates may be highly virulent whereas others may rarely if ever cause disease in humans hence many food safety scientists have concluded that a more appropriate characterization of bacterial isolates for public health purposes could be by virotyping i e typing food associated bacteria on the basis of their virulence factors the book is divided into two sections section i foodborne pathogens and virulence factors focuses in on specific virulence factors of foodborne pathogens and the role they play in regulatory requirements recalls and foodborne illness the oft held paradigm that all pathogenic strains are equally virulent is untrue thus we will examine variability in virulence between strains such as listeria salmonella campylobacter cronobacter etc this section also examines known factors capable of inducing greater virulence in foodborne pathogens section ii foodborne pathogens host susceptibility and infectious dose covers the ability of a pathogen to invade a human host based on numerous extraneous factors relative to the host and the environment some of these factors include host age immune status genetic makeup infectious dose food composition and probiotics readers of this book will come away with a better understanding of foodborne bacterial pathogen virulence factors and pathogenicity and host factors that predict the severity of disease in humans

the jpi climate axis project unpacking climate impact chains a new generation of action and user oriented climate change risk assessments unchain is approaching its end date 31 12 2022 and the project is looking for an opportunity to collect its remaining scientific publications into a research topic the overall objective of unchain is to improve climate change risk assessment frameworks aimed at informed decision making and climate change adaptation action through six methodological innovations to also cover the possible need for long term and large scale efforts of societal transformation to refine a structured method of co production of knowledge and integrate this into impact modelling to develop and test an applicable framework for analyzing how societal change can affect local climate change vulnerabilities to develop and test a standardized analytical framework for addressing uncertainties involved in local decision making on climate change adaptation to integrate the trans national impacts of climate change and to link mitigation and adaptation in climate risk and vulnerability assessments
