brown v board of education of topeka kansas 1954 is regarded as one  
 of the most significant civil rights moments in american history  
 historical observers have widely viewed this landmark supreme court  
 decision as a significant sign of racial progress for african  
 americans however there is another historical perspective that  
 tells a much more complex tale of black resistance to the naacp s  
 decision to pursue desegregating america s public schools this  
 multifaceted history documents the intra racial conflict among  
 black topekans over the city s segregated schools black resistance  
 to school integration challenges conventional narratives about  
 brown by highlighting community concerns about economic and  
 educational opportunities for black educators and students and  
 black residents pride in all black schools this history of the  
 local story behind brown v board contributes to a literature that  
 provides a fuller and more complex perspective on african americans  
 and their relationship to black education and segregated schools  
 during the jim crow era

the collective focus of the essays here presented consists of the  
 attempt to overcome the deadlock between metaphysical and non or

anti metaphysical hegel interpretations there is no doubt that hegel rejects traditional and influential forms of metaphysical thought there is also no doubt that he grounds his philosophical system on a metaphysical theory of thought and reality the question asked by the contributors in this volume is therefore what kind of metaphysics does hegel reject and what kind does he embrace some of the papers address the issue in general and comprehensive terms but from different even opposite perspectives hegel s claim of a unity of logic and metaphysics his potentially deflationary understanding of metaphysics his overt metaphysical commitments his subject less notion of logical thought and his criticism of kant s critique of metaphysics other contributors discuss the same topics in view of very specific subject matter in hegel s corpus to wit the philosophy of self consciousness practical philosophy teleology and holism a particular brand of naturalism language s relation to thought true and spurious infinity as pivotal in philosophic thinking and hegel s conception of human agency and action

hegel and scepticism remains an intriguing topic directly concerning the logical and methodological core of hegel s system a series of contributions is unfolding around a keynote paper by klaus vieweg which tries to understand and restate the limits and the content of the relationship between hegels philosophy and scepticism various hegel readers with different concerns are dealing with hegel s strategy in a large range of theoretical areas
