ttn korea english classics
b translator s preface as will be seen from the author s preface the work was originally issued as the first instalment of a complete treatise of political economy as he went on with his work however marx modified his plans and eight years after the appearance of the zur kritik he

published the first volume of his capital whose scope was intended to cover the entire field of political economy

zur kritik 8

capital volume i the plan to which marx alludes in the preface to the present work was thus abandoned in its formal aspects but not in substance the subject matter treated here was reproduced or rather summarized as marx himself puts it in capital but that was done in so far as was necessary to secure continuity of treatment on the other hand many important matters are treated here more thoroughly than in capital especially the part devoted to the discussion of money this as well as the chapters on the history of the theories of value and of money which do not appear in capital make zur kritik a work practically complete in itself

author s preface translator s preface

introduction to the critique of political economy

there is another reason if any need be given why this book should have been translated into english marx s preface to the present work contains the classic formulation of his historico philosophic theory known as the materialistic interpretation of history this theory which until recently was entertained almost exclusively by socialist writers and was hardly heard of outside of socialist circles in english speaking countries is at last receiving not only due recognition but sympathetic appreciation at the hands of men of science it is rather a significant coincidence that the work which for the first time clearly formulated the law governing social evolution should have seen the light of day in the same year in which darwin gave to the world his theory of organic evolution and as the latter had to fight its way to recognition in the teeth of religious prejudices so has the recognition of the former been retarded by even more powerful social and political prejudices

the introduction to the critique of political economy which is added as a supplement to this book is for the first time published in book form in any language it was written by marx in 1857 but for reasons explained by him in the preface was not published and in fact was never finished by him since according to his changed plans it would have fitted more into the last volume of capital which was to contain a history of political economy the introduction has been published but lately in the form of a magazine article by karl kautsky editor of the neue zeit and literary executor of karl marx
